ITX E-W80S Black

The new generation of Mini-ITX from Inter-Tech - modern, stylish and practical. The **E-W80S Black** is completely made of aluminum and has therefore, also by the many ventilation holes, an excellent thermal load of the components. It also has a very simple and timeless look.

Besides the serial USB connectors, 1x USB 2.0 and 1x USB 3.0, on the side of the case the **E-W80S Black** offers the option to mount a 5.25" slim-drive. The solid aluminum body reduces annoying vibrations to a minimum. Due to its modest HDD- & Power-LED in the bottom it´s a real eye catcher.

Mini-ITX systems are very energy-saving, so that the external 60W Power Supply is sufficient to build up a powerful ITX system.
Once it may be a little more power, you can also use an optional 120W Power Supply, since the internal circuit board is able to process an input power of up to 120W.

An intelligent interior layout allows, despite the small space, an easy installation of all components.
