

Q2 Illuminator Red – The gaming case with lots of features for a small purse!

The **Q2 Illuminator Red** convinces due to its spacious and robust design and has a variety of features. The PSU can be mounted at the bottom of the case and is protected by removable dust filters. The three serial 120mm fans with red LEDs behind the translucent front panel, in the rear of the case and in the cap ensure an optimal cooling of your components. Additional fans can be mounted in the front, on the top and in the window side panel.

Another highlight besides the well-thought-out cooling concept of the **Q2 Illuminator Red** is the easy and quick installation of all components. Serial guide screws ensure an easy mounting of the internal 3.5" HDDs. Two separated mounting options of 2.5" HDDs complete the variety of the case. Due to the combination of intelligent cable management and space for extension cards with a length of up to 37cm, the **Q2 Illuminator Red** becomes a space wonder.

The two **USB 3.0**- and USB 2.0- connectors along with the serial 2in1 Card-Reader (MicroSD and SD) on the top of the case offer a fast and easy handling and complete the package.
