

## **IT-9011 Archer – Luxury don't have to be expensive**

Besides a screwless mounting of nearly all components this case offers maximum elegance and comfort. For example both side panels can be opened like a car door with the patented handle bar and allows a quick access to the interior.

The front is designed in a classy look. The mix of high glossed coating and sheathings in metal look gives this case a very unique style. The controllers and front connectors are all vertically insert into the top of the front so that there should be no problem to reach them.

Other features, like a main board bracket with slot brackets which can be folded downward when the side panels are opened, a additional adjustment for graphic cards or a removable HDD-cage, not only ensures an easy mounting of the components but also that your computer operates more smooth and stabile.

## Specifications
