Easy installation of the component is the top priority for the **2011 series**. Both side panels can be opened like a car door with the patented handle bar.

Because of the fact that the main board rack including the slot brackets is completely downward retractable the main board, cards etc. can be installed very easily and comfortably.

To provide the required stability this case is build out of special reinforced sheets.

USB and Audio connectors in the front ensure a modern interface connection and a standard 400W PSU provides enough power for all your components.
