A6 Superior – the new RTX-Series from Inter-Tech

The power supply is mounted at the bottom of the RTX-Series and the mainboard on the opposite side. The graphic cards have their place in the top quartile and the CPU in the lower. This means, that the heat will be blown out by the two included 120mm fans in the top: an optimal cooling of your components.

Three blue illuminated 120mm fans, the blue bright power button the front panel and the window kit in the side panel, let all gamer hearts beat higher. Equipped with a fast USB 3.0 Port, you are able to transfer data with up to 5 Gbit/s.

Easy-Clip system for the 3.5" and 5,25" bays, an SSD adapter and the possibility to move the cable to the ingenious cable management are just a few of the good arguments that convince.
