ITX-E2010

The new generation of Mini-ITX from Inter-Tech - modern, stylish and practical. The E2010 is very narrow and fits on every desk. The front door slides to a light pressure to the side and if required back again.

Mini-ITX systems are very energy-saving, so that the external 84W Power Supply is sufficient to build up a powerful ITX system.

Once it may be a little more power, you can also use an optional 120W Power Supply, since the internal circuit board is able to process an input voltage of up to 120W.

An intelligent interior layout allows, despite the small space, an easy installation of all components. Front connectors like 2x USB 2.0 and HD-Audio round out the features.
