ITX-E2020

The new generation of Mini-ITX from Inter-Tech - modern, stylish and practical. Das E2020 is characterized by its elegant front with elements of brushed aluminum and mesh. Its also very narrow and fits on every desk.

Mini-ITX systems are very energy-saving, so that the external 60W Power Supply is sufficient to build up a powerful ITX system.

Once it may be a little more power, you can also use an optional 120W Power Supply, since the internal circuit board is able to process an input voltage of up to 120W.

An intelligent interior layout allows, despite the small space, an easy installation of all components. Front connectors like 2x USB 2.0 and HD-Audio round out the features.
