IPC 1U-1019L

The **IPC 1U-1019L** is the perfect rack for a low-priced server system. The excellent quality of the materials combined with superb workmanship establishes the basis for a very variable case.

For example the **IPC 1U-1019L** provides the possibility to mount very different combinations of hard drives. You just have to remove the HDD-bracket behind the 5.25" drive blind and you can install a DVD drive without any difficulty. Otherwise the **IPC 1U-1019L** got internal space for up to three 3.5" or six 2.5" hard drives. Four standard 40mm fans are positioned directly behind the HDD-brackets and guarantee an optimal cooling.

Additional extras like dust filters in the front, the removable and perforated slot bracket or the block connector for the fans complete this total package.
