

SinanPower Battery-Charger CT-515

This innovative battery-charger enables you to make further use of your old and used primary batteries. Up until now it was only possible to reload storage batteries but this device has the ability to do the same with normal alkaline- and NiMH-batteries.

Thanks to a patented method now primary batteries can be recharged not only once but depending on quality and age multiple times.

During the reloading process this device controls automatically the exact charge and can shut down every charging jack individually after the task. And if an error or a malfunction should appear an integrated emergency shut down device comes into action.

Buying less primary batteries helps to preserve the environment.
Buying less storage batteries helps to save your money.
A clever idea - from SinanPower

Specifications

Compatible with	Alkali-, NiHm-, Rechargeable Batteries
Size	AA, AAA
Input	~AC 100V-240V 50/60Hz 6W
Output	DC 1.7V 350mA x4
Fuse	T1A/250Vac
Automatic Shut Down	After 4 Hours After the Charging If the Batteries are Defect Overheating
Material	Plastic
Device Dimensions (H/W/D)	116/67/29mm
Package Dimensions (H/W/D)	227/140/58mm
Weight (net)	160g
Weight (gross)	260g
Packing Units (VE/VPE)	1/60
Guarantee and Warranty	24 Months Warranty
Article Number	88885110
EAN-Code	4260133122376
Scope of Delivery	Power Cord Storage Box for 4x Mignon (AA) Batteries Storage Box for 4x Micro (AAA) Batteries Detailed Manual (German & English)
Features	Individual fuse for every charging jack Secured against wrong polarity of the battery Charges up to four batteries simultaneous and several Microprocessor controls charging Two coloured LEDs informs about charging/State of charge/Charging error
