

ITX M5

The new Mini-ITX generation of Inter-Tech - modern, style-conscious and remarkably practical. The ITX M5 is completely made of 4.5mm thick aluminum and has therefore, also by the many ventilation holes, excellent, thermal load of the components.

Thanks to the large space available, the case offers the possibility to mount either a Mini-ITX or a Micro-ATX* motherboard. For a performance-hungry system, the ITX M5 offers space for a standard ATX power supply.

Two USB connectors in the front, one of them **USB 3.0** and one of them USB 2.0, as well as the opportunity to mount a Slimline DVD round up the diversity of that case.
