

PDU Module M-1681

The **PDU Module M-1681** is a module of a system for the 19" server cabinet to monitor the remote outputs.

The total current consumption, the total voltage and the total power can be scanned through web interface over the Control C-81.

The total current consumption of all connected components can be showed on the display.

For functional operation the base unit C-81 is necessary.

Specifications

Connectors	Power In (C20): 1
	Power Out (C13): 8
	RJ11 (PDU Bus): 1
Controls	Automatic Cutout
LED	Power
	Range
	PDU Link
Material	1.2mm Steel
Packing Unit	Shipping Unit: 1 piece
Guarantee and Warranty	24 Months Warranty
Article Number	88887073
EAN-Code	4260133125315
Scope of Delivery	Mounting Kit
Features	Measurement of Current, Voltage and Output
	Only in Connection with PDU Control C81
	(Article: 88887072)
	Connection Cable: 2m

Dimensions and Weight

	Article	Package
Height	44mm	88mm
Width	432mm	505mm
Depth	65mm	210mm

Weight (net): 1.525 kg
Weight (gross): 1.93 kg
