

Are you still looking for a mobile speaker with powerful bass sound?

Then the new **Bluetooth® Speaker M9** is the right choice for you, because With the **Bluetooth® Speaker M9** a powerful bass sound is no more locally restricted!

Thanks to the smart size and the integrated Bluetooth® technology the enjoyment of the music is no more locally restricted.

Thanks to the telephone function it is still possible to phone even if music is being played. In case of an incoming call the playing will be interrupted and as soon as the call is ended it will restart again. Of course you can also use the speaker without Bluetooth-enabled devices: get a TF-card filled up with your favorite songs, put the card in the slot and you can now enjoy the music with M9.

Specification
