ITX Q-6 Silver

The new generation of Mini-ITX from Inter-Tech - modern, stylish and practical. The **Q-6 Silver** is completely made of aluminum and has therefore, also by the many ventilation holes, an excellent thermal load of the components. It also has a very simple and timeless look. The solid aluminum body also reduces annoying vibrations to a minimum.

Mini-ITX systems are very energy-saving, so that the external 60W Power Supply is sufficient to build up a powerful ITX system.

Once it may be a little more power, you can also use an optional 120W Power Supply, since the internal circuit board is able to process an input voltage of up to 120W.

An intelligent interior layout allows, despite the small space, an easy installation of all components.

Specifications

Motherboard	ITX
Drive Bays	2.5" Slim: 2
