The **K-11 Midi-Tower** knows to convince due to its great price-performance-ratio. A well thought out construction of the case gives the option to mount up to four 3.5" and/or 2.5" hard disks - one of them even in the back of the mainboard tray. The elegant front panel comes with a brushed aluminum look-a-like design and gets its stylish finish due to the glossy top.

The serial USB 2.0 and HD-Audio-connectors are mounted on top of the front panel. The case comes with an economical and quiet SL-500 PSU and can handle graphic cards up to a length of 35cm.
