IPC 1U-K-125L

The **IPC 1U-K-125L** is the perfect rack for a small and cost-effective server system. Its compact design and its small installation depth of 250mm for ITX boards allows this case to fit in to nearly every rack and provides also removable rack mount brackets for even more individuality.

The **IPC 1U-K-125L** provides internal space for optional 1x 3.5" or 2x 2.5" hard drives. Two standard 40mm fans, which are internally mounted behind the front panel, ensure a reliable and optimal cooling.

A standard 200W power supply with enough connectors for your components, as well as the two USB 2.0 ports in the front panel complete the package.
