

IPC 2U-2098

The **IPC 2U-2098** is the perfect rack for a low-priced server system. The excellent quality of the materials combined with superb workmanship establishes the basis for a very variable case.

For example the **IPC 2U-2098** provides the possibility to mount a 2U server power supply in the rear of the cage or as an economic alternative a normal ATX power supply in the front. So if you want to operate this case with a server power supply you just have to exchange the rear HDD-cage with the ATX power supply bracket* and remove the rear fan bracket.

Additionally the **IPC 2U-2098** is equipped with a standard 80mm fan, perforated slot brackets and dust filters in the front doors. This guarantees an optimal cooling of the assembled components.

Beyond that the **IPC 2U-2098** features lockable doors to ensure a maximum of security of your sensitive data.

*Through the installation option for standard ATX power supplies, the case provides 6mm more height than a standard 2U case.

Specifications

| | |
|------------------------|---|
| Motherboard | Mini ITX, mATX, µATX, ATX maximal motherboard size WxD: 305mm x 244mm, 12" x 9.6" |
