CobaNitrox – Sub-Raid SB-C 102
- Your Data Preserver

This compact S-ATA RAID System provides schools, public facilities, controllers in offices or even your own personal PC at home the opportunity for a high speed data back up. It's the best option when you need high performance but don't want to spend much money or time.

The SB-C102 operates on its own. Just plug it in, adjust it and here it goes!

Through the HOT-SWAP-Racks the hard disks can be changed while the PC is in actual operation.

Specifications

Raid Level	RAID 1
Processor	MSR 2044
